

# END USER INTERACTION STORY BOARD I

Receptionist Katie, receives a call and needs to schedule an appointment.

## Home page / Appointment

1. Loads the application.

The screenshot shows a web browser window for 'VetsPlace'. At the top, there's a search bar and a navigation bar with tabs for 'Schedule' (which is selected), 'Clients', and 'New Appointment'. Below the tabs, a table lists appointments for 'Tuesday 10/24/2023'. The table has three columns: 'Appointment Information' (listing client name, pet name, and doctor), 'Time' (listing time slots from 8:00am to 12:00pm), and 'Doctor' (listing Dr. Bob, Dr. Carter, or Dr. Bob again). There are many empty time slots available for scheduling.

2. Clicks the New Appointment button.

## Create appointment

3. New Appointment Form pops up.

4. Uses the calendar function to select date, (can also just type the date.)

5. Enters the information needed:

- > Client Name
- > Pet Name
- > Doctor
- > Complaint

6. Clicks Create Appointment.

7. New Appointment shows up on the list.

The screenshot shows a modal dialog box titled 'VetsPlace New Appointment'. It has a date field set to '10/24/2023'. Below it are four input fields: 'Client' (empty), 'Pet' (empty), 'Doctor' (empty), and 'Complaint' (empty). At the bottom right of the modal is a 'Create Appointment' button. Behind the modal, the main appointment list is visible, showing the same data as the first screenshot.

End.
